

Important Announcement!

Express Scripts and Medco Health Solution Complete Merger

What is the merger about?

On April 2, 2012 Express Scripts completed its previously announced acquisition of Medco Health Solution. Medco and Express Scripts are moving forward together as one Prescription Benefit Management company to offer its clients best-in-class clinical expertise and innovative applications to improve patient health while driving down the cost of healthcare.

What is the immediate impact of the merger?

Your Medco prescription coverage with SAMBA remains the same and no action is required. Members will continue to have access to the same medications, pharmacies and clinical experts. Members will continue to use the same Medco phone numbers, website and mobile app currently used.

Will there be any impact to the continuity of drug availability, drug access or changes to standard formularies?

There will be no disruption to the accessibility or availability of drugs.

How will I know of any my prescription benefit changes?

Your current prescription benefits cannot change for the remainder of the 2012 calendar year. All benefit changes, if any, for the 2013 calendar year will be announced during the annual Federal Employee Benefits Open Season period beginning November 12, 2012.

I hear that Walgreens is not in the Express Scripts network. Can I still use Walgreens?

Yes, Medco has Walgreens in their network and you will be able to continue to use Walgreens.
